Accumulator Round

What's an Accumulator you ask?

One round - timed. Fences 1 to 10. Each fence has it's own value, ie fence 1 is worth 1 point, fence 2 is worth 2 points, etc.

Knock a fence down - 0 points for that fence. Each fence increases with degree of difficulty. Joker is an option for fence 10 (and will be higher than the class height).

Joker is worth double points, ie 20 if you clear it - or you lose the 20 points if you knock it down.

Highest points with fastest time (if more than one horse/rider) is the winner.

What is a power and speed?

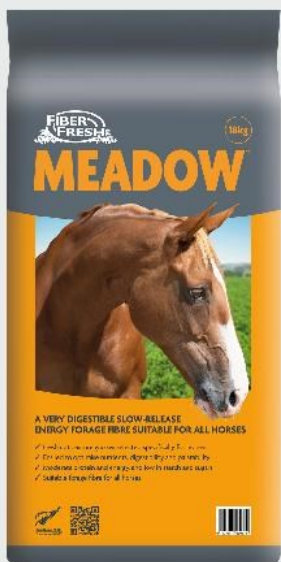

This format splits one course into two phases.

The first phase is power. During the power phase the rider wants to stay clear and in the time.

The speed phase is the same as a jump off, the only difference is that the power and speed format is all one continuous course.

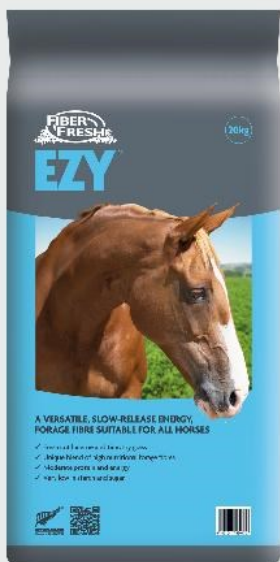

Faults incurred on each phase (judged separately) are added to decide the winner. In the event of equality of faults, the winner will be the competitor with the fastest time in the second phase.
