HAND SANITISER PROVIDERS

ESNZ is aware that everyone will be hunting for hand sanitizer and while companies have started producing more, it is still proving difficult to find and availability is unlikely to improve anytime soon. Therefore, we thought we would put together this list of reputable hand sanitiser suppliers to make it easier for Area Groups/Clubs and Organising Committees.

NZ Police have also advised that scammers have started targeting online hand sanitiser buyers. So, we ask that Area Groups/Clubs and Organising Committees be vigilant about what they purchase online, especially if it is through social media or a message service. Where possible, avoid paying for goods through a bank transfer without a means of verifying whether the vendor is genuine or not.

You are not obligated to purchase your hand sanitizer supplies from the list we have compiled, however, we have spend time to ensure that all of the suppliers below are reputable and safe for you to purchase from.

WHAT TO LOOK FOR IN A HAND SANITISER

- Must be an alcohol-based hand sanitiser
- Must contain at least 60% alcohol.
