  - Different shows in different countries
  - Asking for help
  - No question never a bad one
  - Producing horse
  - Distances
  - Being on our own
  - Prepare yourself

Mandy Ilston spoke briefly about her experiences in the sport

- Roger Laplanche:

He spoke on Time faults

Here for the sport, tests, hard and easy, measure the course, always a time, according to the track, 350 normal, keep a good forward momentum, keep going forward. Big corners get time faults,

Training days for time 350metre, using the whole arena at some shows, poor ground, poor weather for changing the time faults. Td, ground jury if need to ask a question. Talk to course builders, doing it for us not them, all about the sport, might be wrong measurement, double check, don't want to see it wrong, making distances longer to make people go forward, SH all about forward, keeping momentum, SH is good for teaching you to ride on a rhythm.

20 meter circle as a general corner size otherwise too tight, ask if you need advice or a query

Water at the NEC discussion

Future plans for the NEC, Gus Taylor spoke briefly

Pony sh ring and ring 3 new rubber, water trucks, dressage doing a deal with treadlight for other arenas
