

ESNZ SPONSOR SIGNAGE

Our national sponsors are hugely important to the success of Jumping and have invested heavily (in excess of \$17,500) in corflute boards and banners.

Given the significant cost it is important that they are looked after well. Carry bags for sponsor signage (corflutes and banners) have been provided as a means of protection and for ease of carrying.

Responsibility for corflutes and banners at Area shows

The person responsible at a show must ensure that all items as listed on the outside of the 'carry bags' are accounted for on receipt and at the end of the event. Please also ensure that arrangements are in place for their delivery to the next event.

Each carry bag contains a laminated inventory sheet with an image of each component (poles, ground pegs etc) that makes up the banner. The person responsible is to this list to ensure all parts are accounted.

Installing corflute boards

Ideally, the corflute boards should only be fixed to timber backing using 'surefast 25mm woodscrews with countersunk square driver heads with mudflap washers. Cable ties may be used where attaching to netting, but in these circumstances the signs need to be fixed tight or movement will cause damage.

Here is an example:

Installing banners

Top and bottom rope or elastic are provided with each banner and should be used to secure each end of the banner with twine through the intermediate eyelet holes. Alternatively, where fixing to timber, 25mm surefast screws and mudflap washers may also be used.

Removing sponsor signage at end of event

Please ensure all sponsor signage is carefully removed and repacked into the carry bags at the end of your event and that the carry bag is delivered to the person transporting the sponsor signage to the next show. Please ensure every component is accounted for
