

SEPTEMBER FLIGHT

Notice of helicopter use for visual inspection of transmission lines in your area.

Transpower, the owner and operator of the national grid, will be carrying out a routine visual maintenance inspection of transmission lines in your area by helicopter.

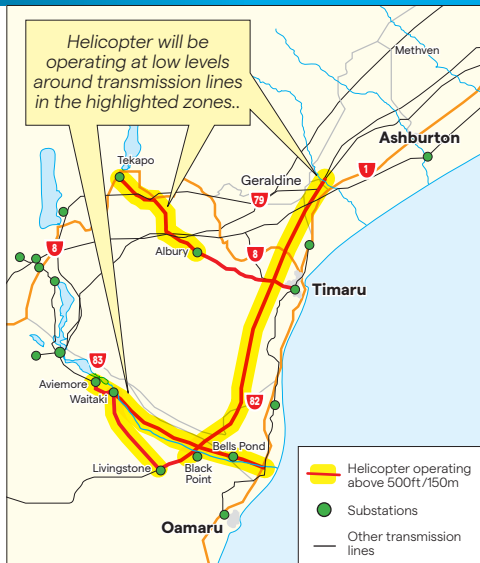

We will be undertaking inspections of the structures on the **Glenavy-Waitaki and Tekapo-Timaru 110 kV lines** and also **our Roxburgh-Islington and Aviemore-Livingstone 220 kV lines** (as shown on the map) by a low flying helicopter over the next two months.

Our first flyover date is planned for Tuesday 26 September 2023.

The helicopter will fly at a constant speed of about 30 km/h, and will take approximately 4 hours per session.

In the event of bad weather the work will be deferred until the following day - Wednesday 27 September.

Helicopter will be operating at low levels around transmission lines in the highlighted zones..

It's important to us that you are kept informed and updated on our activities.

If you require further information, please call Jim Cormack on 021 357 996.
